

Seeing a Safer Tomorrow[®]

Workplace incidents are continuing to happen, even with training, procedures, and systems in place. At COVE, we teach workers how to truly see hazards using Visual Literacy, so they can take action before something goes wrong — reducing incidents and creating a safer, more alert workforce.

Reduce risk. Save lives. See hazards with COVE training.

TRAINING FOR INDIVIDUALS & TEAMS
([HTTPS://WWW.COVECTR.COM/TRAINING-FOR-INDIVIDUALS-AND-TEAMS/](https://www.covectr.com/training-for-individuals-and-teams/))

TRAINING FOR ORGANIZATIONS
([HTTPS://WWW.COVECTR.COM/TRAINING-FOR-ORGANIZATIONS/](https://www.covectr.com/training-for-organizations/))

Hi there! What brings you to COVE today?

In today's fast-paced, visually overloaded world, your employees need more than reminders to "pay attention." They need practical tools to slow down, look with purpose, and see hazards before they lead to incidents. Visual Literacy equips your team to do just that — **building sharper awareness and stronger decision-making skills that protect both people and performance.**

Visual Literacy Empowers Your Team To:

Prevent incidents where we don't see the hazard

Use proven tools and techniques to strengthen how they see hazards and interpret risks

Build critical thinking and problem-solving skills that improve safety and operations

What Is Visual Literacy And How Can It Improve Workplace Safety?

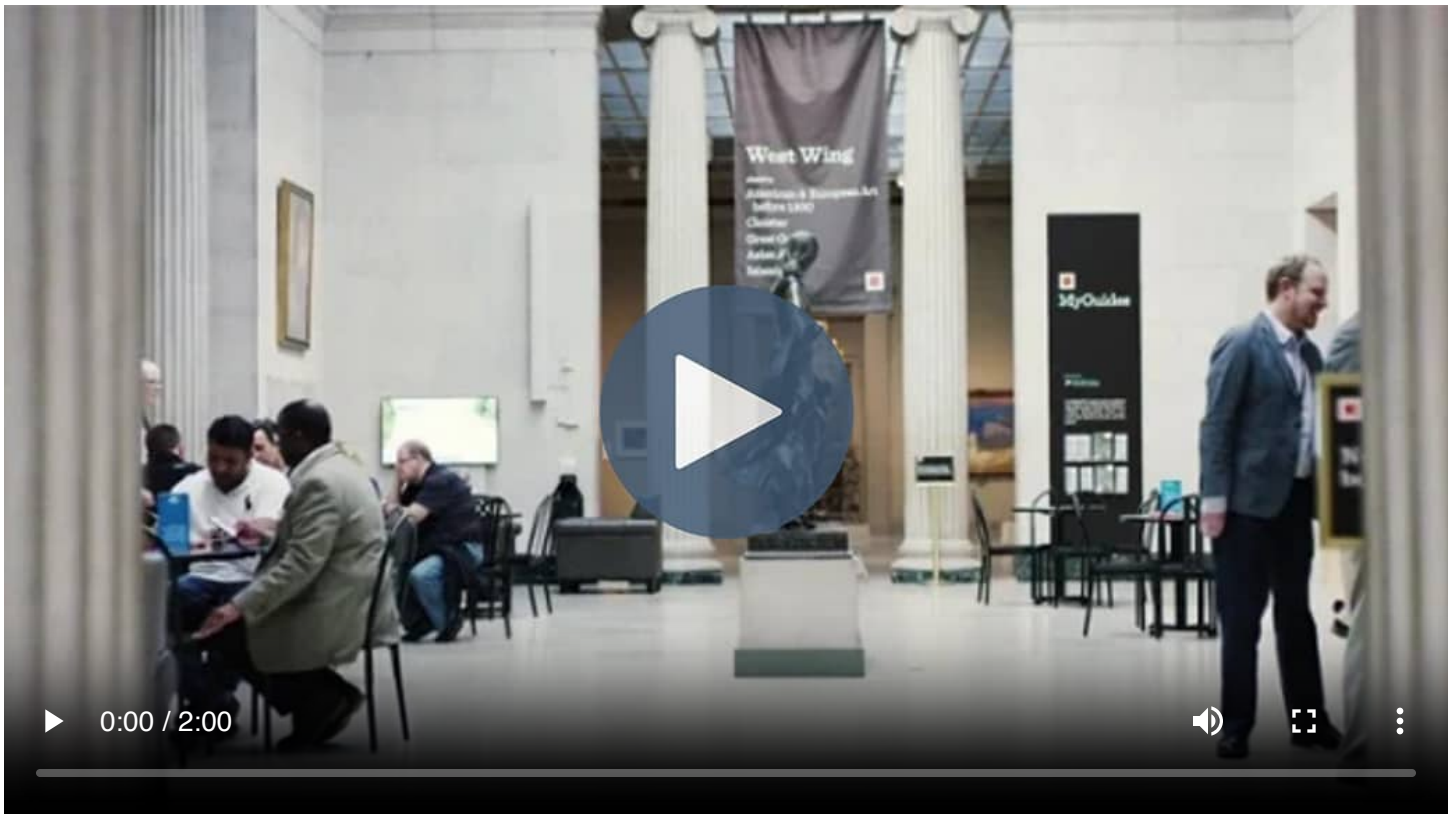

COVE's cutting-edge visual literacy curriculum is based on the Toledo Museum of Art's effort to help people see the world. Since its inception, TMA has spearheaded the effort to increase visual comprehension and communication via the world's great works of art. Now we're putting theory into practice, working with major organizations to drive success at every level by implementing strategies for seeing better in the workplace.

SEE HOW
([HTTPS://WWW.COVECTR.COM/INTRODUCTION-TO-VISUAL-LITERACY/](https://www.covectr.com/introduction-to-visual-literacy/))

Benefits Of A Visually Literate Workforce

Learning to process visual information effectively is more than just theoretical. Organizations looking to improve Environmental Health and Safety processes can adopt this Visual Literacy approach to enhance hazard recognition, incident investigation and pre-job safety analysis; decrease incident rates, while saving time; and train their team to engage safely with the workplace environment.

Getting Started With COVE

To get started with this leading edge and innovative approach, we recommend attending a **Seeing Safety: Foundations of Hazard Identification** workshop. We offer pre-scheduled open workshops or we can work with you directly to conduct a dedicated workshop geared towards your organizational needs.

Once you've built proficiency in the methodologies, we can partner with you to design a deployment plan focused on staff growth and development and improve the visibility of improvement metrics.
